SPI
OIL & GAS نفط وغاز

COMPANY PROFILE

Société Pétrolière Internationale

Moving energy from source to market

Headquartered in Muscat, Sultanate of Oman
Muscat · London · Algiers · Houston · Singapore

2026

A trusted partner in the global energy supply chain

An Omani oil and gas company connecting energy resources with the markets that need them.

Société Pétrolière Internationale (SPI LLC) is an oil and gas company established and headquartered in Muscat, Sultanate of Oman. Its core business is the trading and distribution of petroleum products — crude oil, refined fuels and liquefied gases — and it plans to expand into exploration and production.

SPI plays an active role in the global supply chain: it ensures that energy is supplied and distributed efficiently between producing regions and consuming markets, supporting international energy trade and security of supply.

Through the SPI Group of Companies, SPI also invests in sustainable real estate, renewable energy, research and education, guided by innovation, excellence and environmental responsibility.

Continents served

Our mission

To provide our clients and partners with top-level expertise, reliable energy supply and creative solutions, while maintaining the highest professional standards in every transaction and every project.

Our vision

To become a reference energy group from Oman, continuously developing our knowledge, methods and technologies, and recognised for our integrity, our innovation and the value we create for our clients.

The principles that guide our decisions

Excellence
Consistently high quality and professionalism across all our operations.

Integrity
Clarity, honesty and ethical business conduct in every interaction and decision.

Safety
The safety and well-being of our employees and of the communities we serve come first.

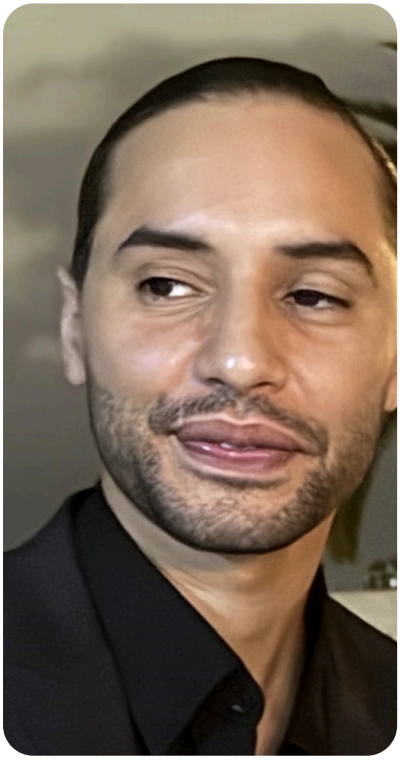

Sustainability
A full commitment to environmental responsibility and to the energy transition.

Collaboration
Teamwork and partnerships to achieve shared success.

Innovation
Advanced solutions to meet the evolving challenges of the oil and gas industry.

Global citizenship
A positive contribution to society through lasting initiatives and social engagement.

A word from our President

At SPI, we believe that the future of energy is one where reliability, sustainability and technological progress go hand in hand.

From our base in the Sultanate of Oman, our ambition is to build a dependable bridge between energy resources and the markets that need them. Our strength lies in the trust of our partners, the rigour of our operations and the commitment of our teams.

Integrity, collaboration and sustainability remain at the heart of our decisions. They reflect our responsibility towards our shareholders, our employees and the communities we serve. I thank all our partners for their confidence.

Mehdi SAID
President, SPI LLC

Integrated solutions for the oil and gas industry

International trade, product supply, storage, finance and industry network: a complete offer for the oil and gas sector.

International trade

Access to global markets through strategic trade solutions and long-term partnerships.

Supply of products

Crude oil and refined products delivered to end users, to specification and on schedule.

Distribution & storage

Tank storage, safe delivery and logistics supporting refining and distribution.

Banking & finance

Project funding, risk management and strategic investment for the oil and gas sector.

Industry network

Events and platforms that connect professionals and spread best practices.

Sustainability

Lower-carbon technologies, renewables and sustainable real estate developments.

Our products

Crude oil

Sourcing and sale of crude grades for refiners, matched to their processing needs and delivery schedules.

Gasoline

Supply of motor gasoline meeting the quality specifications of each destination market.

Diesel & gasoil

Diesel and gasoil for transport, industry and power generation, delivered on time and on specification.

Jet fuel & kerosene

Aviation fuel and kerosene supplied to distributors and end users under strict quality control.

LPG

Liquefied petroleum gas (propane and butane) for domestic, commercial and industrial use.

LNG

Liquefied natural gas, a key fuel for power generation and for the energy transition.

An integrated presence along the value chain

From the source to the end user, SPI manages each step of the flow of energy.

01 — Sourcing
Crude oil and refined products sourced from producers and refiners.

02 — Storage
Tank storage at strategic hubs, such as our Sohar project.

03 — Logistics
Safe transport by sea and by land, with strict quality control.

04 — Delivery
Supply to industrial, commercial and institutional end users.

05 — Financing
Trade finance and risk management securing every transaction.

Strategic projects

REFINING

Refineries in North Africa

SPI is developing refining capacity in North Africa to process crude oil close to its source and meet growing regional demand for quality fuels.

- **Resources:** proximity to major oil and gas reserves, reducing transport costs and securing feedstock.
- **Trade routes:** access to maritime routes and ports for exporting refined products.
- **Workforce:** a skilled and experienced labour pool for specialised refining operations.
- **Stability:** an environment suited to long-term investment.

STORAGE

Tank storage terminal in Sohar, Oman

A storage project at Sohar, one of the Sultanate's main industrial hubs, to support the flow of crude oil, petroleum products and chemicals between the Gulf and world markets.

- **Location:** outside the Strait of Hormuz, with direct access to the Arabian Sea and the Indian Ocean.
- **Industrial hub:** next to Sohar Port and Freezone, home to refineries, petrochemical plants and logistics facilities.
- **Infrastructure:** deep-water port facilities connected to major highways and industrial zones.
- **Growth:** supported by Oman's economic diversification and foreign investment.
- **Market demand:** rising need for storage capacity in the Middle East.

Future developments

Refineries & petrochemicals

Advanced refining and petrochemical complexes using AI to improve efficiency, output and sustainability.

Gas processing plants

Strengthening natural gas infrastructure to serve domestic and international demand.

Carbon capture & storage

CCS projects to reduce emissions in line with international standards.

Strategic partnerships

Alliances with global industry leaders to bring best practices and innovation.

Renewable energy

Solar, wind and other clean-energy projects complementing our oil and gas activities.

Residential real estate

Housing for Oman's growing population, aligned with Oman Vision 2040.

Renewable energy

Solar energy

Solar farms and rooftop installations in diverse locations.

Wind energy

Wind farms using advanced turbines and careful site selection.

Biomass

Bioenergy from agricultural residues, forest biomass and waste.

Hydroelectric power

Clean electricity with sustainable water management.

Research & development

Enhanced oil recovery (EOR)

Techniques that recover oil which would otherwise remain trapped in the reservoir, extending field life while limiting environmental impact.

Advanced drilling technologies

Access to previously unreachable reserves with fewer wells, greater safety and a smaller surface footprint.

Carbon capture & storage (CCS)

Capturing CO_2 from industrial processes and storing it permanently underground.

Shaping the future of oil and gas education

Knowledge is power, and learning must be continuous. Our vision is to make the SPI Training Institute a leading hub of oil and gas expertise. Through seminars, talks and training centres, the Institute will encourage innovation, build skills and prepare the next generation of industry leaders.

Seminars

Led by industry experts, from refining technologies to sustainable trading practices, with workshops and collaborative projects.

Talks

International speakers on today's challenges, emerging trends and future opportunities in the sector.

Training centres

Modern facilities in key regions, from foundation courses to advanced certifications.

Special Educational Needs (SEN)

SPI believes in giving back to the communities it serves. Our SEN initiatives aim to support people with diverse learning needs and promote inclusive education.

Why invest in Oman

Located at the crossroads of the world's major trade routes, the Sultanate of Oman is a key hub for oil and gas. The country's commitment to economic diversification and its significant investments in infrastructure create a stable and attractive environment for investors.

OMAN

Sohar

Fast-growing industrial hub with a major port and a free zone offering tax incentives and streamlined regulations.

NORTH AFRICA

Algiers

A major oil and gas region with large reserves and a Mediterranean location.

UNITED STATES

Houston

The world's energy capital, offering expertise, technology and markets.

ASIA

Singapore

A global financial centre with energy infrastructure and access to Asian markets.

Oman Vision 2040

Launched in January 2021 by order of His Majesty the Sultan, Oman Vision 2040 sets out the strategy to strengthen the country's competitiveness and diversify its economy. In line with this vision, SPI plans to expand into residential real estate, with housing projects designed for Oman's growing population and the professionals attracted by its expanding industries.

Five offices, four continents

Our network gives us local knowledge and direct access to the world's main energy markets.

HEAD OFFICE

Muscat

Sultanate of Oman

Regional operations and strategic initiatives.

EUROPE

London

United Kingdom

European hub for major projects and market strategy.

NORTH AFRICA

Algiers

Algeria

Supports SPI's activities across North Africa.

AMERICAS

Houston

United States

Central point for North American activities.

ASIA

Singapore

Singapore

Access to and management of Asian markets.

Responsible business, everywhere we operate

As an international trading company, we hold ourselves to clear standards in every market.

Compliance

Respect for applicable laws, international regulations and trade sanctions.

Know your counterparty

Careful due diligence on clients, suppliers and partners.

Business integrity

Zero tolerance for bribery and corruption in all our dealings.

Health, safety & environment

Safe operations and continuous reduction of our environmental footprint.
